THE ALAN M. VOORHEES DISTINGUISHED LECTURE

Tuesday, April 11, 2017, 5:00 p.m.

**Governor James J. Florio Special Events Forum, Civic Square Building
33 Livingston Avenue, New Brunswick, NJ**

Safe, Green, Smart and Equitable Transportation for New York City

Michael Replogle
Deputy Commissioner for Policy
New York City Department of Transportation

Michael Replogle was appointed Deputy Commissioner for Policy in June 2015. As manager of NYCDOT's Policy Team, he develops strategy and advises the Commissioner and City Hall on a broad array of transportation issues to advance the OneNYC sustainability agenda of Mayor Bill de Blasio. He is shaping many key initiatives in traffic safety, freight, parking, shared streets, smart traffic management, autonomous vehicles, and shared mobility, and helps manage the City's work with federal and regional agencies.

Replogle co-founded and chaired the Partnership on Sustainable Low Carbon Transport (SLoCaT) Foundation, which advanced sustainable transport in global climate, finance, and sustainable development policy. Replogle founded and helped lead growth of the Institute for Transportation and Development Policy to a staff of 80 and a budget of \$10 million, advancing better urban public transport, walking, cycling, and planning world-wide. As Transportation Director for the Environmental Defense Fund, Replogle advised city and national agencies on transport, finance, and regulation, following a decade of growth management work for Montgomery County, Maryland.

**A reception will precede the lecture. Please RSVP by Thursday, March 31 by visiting
<http://bit.ly/vtc-replogle>.**

*Reception 5-5:30pm, Lecture 5:30-6:30pm, Q&A 6:30-7pm
AICP Certification Maintenance credits are pending for this event.*

The **Alan M. Voorhees Transportation Center** is a national leader in the research and development of innovative transportation policy. Located within the **Edward J. Bloustein School of Planning and Public Policy** at Rutgers University, the Center brings to bear the full array of resources of a major research university on transportation issues of regional and national significance. The Bloustein School has established national and international reputations for excellence in educational and research programs in the areas of urban planning, urban studies, public health, and public policy.
